

LCA.FD GLOBAL SUPPLY CHAIN MANAGEMENT (ACS)

2 years
4 semesters

**REGULAR
TRACK**

About Program

The Global Supply Chain Management (ACS) program is designed for students interested in pursuing an exciting career in Supply Chain Management. We created this program in response to the growing demand for Supply Chain and Logistics professionals by the business community in and around Montreal and globally.

Our students become specialists in the global fields of product procurement, production, transportation, warehousing, and distribution.

Businesses in Transportation, Logistics, and Supply Chain commonly use Information Technology as an enabler to run their operations smoothly. For that, we have integrated an IT component into the program to ensure that our graduates have well-rounded skills to help contribute efficiently to a dynamic work environment.

Take advantage of Montreal's position as an international transportation and logistics hub and pursue a profitable career in Supply Chain Management.
